

CONTENTS

Part A

SECTION ONE

THEORIES AND METHODS OF SAFETY SCIENCE

- Safety in Today's World, New Challenges?
PASMAN Hans J (3)
- Mathematics Idea of Sustainable Safety System Development—Approach by Survival Theory
Andrzej H. SZYMANEK (19)
- Discussion of Some Problems on Safety Development and Safety Science
YUAN Changming & YUAN Yin (25)
- Coal Mine Accident Prediction with the Model Coupling Grey Theory and Markov Chain
DONG Sihui (29)
- Study on Evolutionary Law of Occupational Safety
YAO Youli (35)
- Econometric Analysis on Relativity Between Economic Structure and Accident Risks
SONG Li, HE Xueqiu & LI Chengwu (40)
- The Rough Set Analysis on Safety Psychology of Construction Builders
WANG Xiaoqun (44)
- Evaluation of Potential Accident and Emergency Management Based on FAHP
MA Maodong, WANG Liqiong, WANG Nafeng & ZHANG Qian (49)
- Study on the Prevention of Mine Disaster Based on Self-Organized Criticality Theory
LIU Nianping, WANG Hongtu & YUAN Zhigang (55)
- Numerical Simulation on Nuclear Accident Hazard Predicting and Warning
HUANG Shunxiang, LI Huimin, FU Tianbao, LIU Feng, WANG Yonghong & ZHAO Yuan (59)
- New Optimized Fault Tree Analysis Method and its Application
YANG Yi, YUE Bin, PING Gonghui & WANG Hui (64)
- Study on Analysis and Control Model of the Organization Errors in Aviation Accidents Based on the Theory of Hazards
DENG Qiong, QI Wei & FENG Long (68)
- Model of Total Factor Productivity on Coal Mine Safety Efficiency
SHI Wenli & GAO Tianbao (75)
- Unascertained Model of Colliery Safety Grading Evaluation
SHI Wenli & GAO Tianbao (81)
- Model for Transformation and Quantification of Safety Social Benefits and Its Applications
WANG Haiyan, ZHOU Xinquan & ZHANG Zhenlong (87)
- Data Mining for Coal Mine's Inherent Safety Based on Fuzzy Comprehensive Evaluation
CHEN Zhangliang, SUN Yufeng & LI Zhongcai (95)

SECTION TWO

SAFETY ASSESSMENT AND RISK ANALYSIS

- Risk, a Persistent Issue
Ben J. M. ALE (105)

- Overview of Risk Importance Measures and Investigation on Their Applications for Maintenance
LU Lixuan (113)
- Forensic Engineering Investigation of Basketball Goal Support Failure
David S KOMM, Quent AUGSPURGER & MCSPADDEN Hugh J (121)
- Control Strategy for Industrial Safety Based on Dynamic Modeling of Safety Budget-Industrial Accidents
Relationship
Gi Heung CHOI & Keun Oh LEE (131)
- Process Plant Designs Based on Process Safety Principles and Science
Jan C A WINDHORST (136)
- Risk Analysis for Urban Pipeline System Carrying Natural Gas
LIU Fei, WANG Tong & LÜ Lianghai (144)
- Dynamic Safety Evaluation and Risk Degree Judging of Fire Accident
ZHANG Jiayong, LUO Xinrong, GUO Liwen, GONG Xuemin & TIAN Lilong (151)
- Uncertainties in Fire Risk Assessment
TENG Jinping (158)
- Research on the Classification Index of the Occupational Hazards Degree in the Toxic Workplace Using Analytic
Hierarchy Process (AHP)
WANG Shanwen(163)
- Variable Fuzzy Assessment Method and Its Application in the Evaluation of Chemical Industry Park Emergency
Response Capability
PAN Ke, JIANG Qiuyun & YAN Shanyu (171)
- Safety Evaluation of Gemini-Type Quaternary Ammonium Salt Antibacterial Reagent
ZHOU Fei, SUN Yuhan, WANG Qinqin & ZHANG Zhili (177)
- Safety Assessment of Mansion Demolition Blasting
YUAN Changming, CHE Huizi & YUAN Yin (182)
- Study on Application of Extension Method in Urban Regional Fire Risk Evaluation
Qiao Zhongliang (188)
- Study on Weight-Quantifying Methods for an Index in Fire Risk Evaluation of Buildings
TIAN Yumin (194)
- Flight Operation Risk Assessment Method Based on BP Neural Network Algorithm
YU Liling, XIAO Xianbo, WANG Haofeng, LI Bin & XU Xiangsong (200)
- Set Pair Analysis Model and Application for Safety Evaluation on Mining Condition in Coal Mine
LI Fanxiu & MEI Ping (207)
- New Method for Risk Evaluation of Extended Reach Wells
ZHANG Hui, GAO Deli, HAO Zhiwei & TANG Haixiong (212)
- Based on BP Network of Safety Assessment to Tailing Reservoirs
DING Huizhe, WANG Hailiang, LÜ Xiujiang & CHEN Li (217)
- Research on the Risk Assessment Method of Risk-Based Inspection (RBI) Technology Combining the Reliability
SHI Chao, GAO Lijun & GAO Xu (222)
- Analytic and Comparative Study on Three Sets of Disaster Risk Assessment Index Systems
HE Chuan, LIU Gongzhi, REN Zhigang & WANG Shanwen (231)
- Determination of Coal Mine Safety Risk System Indicator Weight Based on BP Neural Network
WANG Xiangyao & CHEN Mingli (239)
- Fire Risk Assessment of PVC Cables Based on Proved Fuzzy-AHP
LI Qiang (245)

- On Fuzzy Interval Mark and Fuzzy Gravity Center Decision Method Approach to Computing Fire Risk Ranking of High-Rise Buildings
LI Jinmei (251)
- Risk Assessment on Subsea Tunnel Operation System
ZHANG Sulei, FENG Quanzhang, DONG Xiaoming, ZHANG Dingli & CHEN Fengbin (257)
- Method for Risk Analysis of Gas Explosion Based on Bayesian Networks
DONG Dingwen, LI Shugang & CHANG Xintan(262)
- Fire Risk Assessment for the Public Gathering Place with Fuzzy and Grey Incidence Analysis
SUN Duoqiao & HOU Zunze (268)
- Mine Safety Evaluation by the Extenics Theory
REN Fenhua, YANG Zhijun & LIU Yuxiang (273)
- Application of FTA Method in Ship Collision Accident Research
YAO Jie & REN Yuqing (278)
- Fuzzy Safety Assessment of Underground City Gas Pipelines
WANG Xuan & LIU Yang (282)
- Study of the Fuzzy Comprehensive Evaluation Model of China's Urban Environmental Emergency Response Capability
YAN Wei (286)
- Fuzzy Comprehensive Evaluation Model and AHP on Road Transportation Risk Evaluation of Hazardous Chemicals
SUN Nannan & DUAN Yao (291)
- Evidence Theory Model and Its Application for Fire Risk Assessment of Long-Highway Tunnel
LIAO Shichao, WANG Wei & XU Zhisheng (298)
- Fuzzy Comprehensive Evaluation on Occupational Disease Risk of Coal Mine Enterprise
LIANG Kaiwu, MA Aixia & CAI Zhiyong (305)
- Risk Monitoring Indicators Construction of Civil Aviation Industry Based on Comprehensive Weighting Method
CHEN Yanqiu & HE Pei (310)
- Study on Human Risk Assessment Based on Neural Networks BP Algorithms
CHEN Guofang, LI Ning & WANG Feng (317)
- Causing Analysis of Static Disaster at Filling Station and Its Prevention & Control
LIU Yingxue, CUI Qibi, HU Xien & ZHAO Quan (320)
- Hazards Evaluation Model of Methane Explosion Based on BP ANN
JIA Zhenzhen, YE Qing & FENG Tao (325)
- Study on Integrated Risk Assessment for Fire Safety with Uncertainty Analysis
LIU Yi, LIU Zheng, CHEN Jianguo & CHEN Lin(332)
- Construction Risk Assessment for Shiziyang Tunnel of Guangzhou-Shenzhen-Hongkong Passenger Special Line
LI Jun, XU Zhisheng, WANG Wei & WU Dexing (339)
- Technical Risk Assessment in Aviation Equipment Development Based on Integrated Methodology
DONG Huiru & WU Jun (345)

SECTION THREE

SAFETY MONITORING AND SUPERVISION

- Test Apparatus for the Evaluation of the Behaviour of Smoke Detectors in Non-fire Situations
KRÜLL Wolfgang, SCHULTZE Thorsten, WILLMS Ingolf & FREILING André (353)

- A Generic State Model with Neighbourhood Support from Wireless Sensor Networks for Emergency Event
Detection
Yanning YANG, Andrew J. MAY & Shuang-Hua YANG (365)
- Current Status of Tailing Ponds in China and Framework for Safety Monitoring Technologies
LI Quanming, WANG Yunhai, XIE Xuyang & ZHONG Maohua (377)
- Combination and Application of Direct Clustering and Gray Relevance Degree in Cracks Analysis
XU Bo, HOU Yue & XIA Hui (383)
- Rapid Determination of BTEX in Vehicles by Mid-Infrared (MIR) Technique Combined with Chemometric
Methods
XU Liheng & ZHANG Ming (389)
- Corrosion Evaluation of Seamless Steel Gas Cylinder Through Statistical Methodology
TANG Ping & JIANG Juncheng (394)
- Agents and Their Cooperation for Monitoring of Regional Major Hazard Installations
ZHOU Jianfeng , CHEN Guohua & CHEN Qingguang (398)
- Security Monitoring Platform of In-line Multipoint Initiation Control System Based on LabVIEW
LI Shoudian, YUAN Shiwei & ZENG Qingxuan (405)
- Research and Design of Coal Miner Monitoring System Based on RFID Technology
SUN Chuanyu, XIAO Linjing & WANG Shuping (410)
- Research on the Deformation Law of Soft Rock Roadway in High-Stress Area in an Underground Iron Mine
SONG Weidong, WANG Xin, DU Jianhua & WU Shan (418)
- Discussion on Methods for Pipeline Leak Detection
YUAN Yin, YUAN Changming & CHE Huizi (425)
- Research on the Fault Prediction Method of Rod Pumping System in Directional Wells
LIU Jingcheng, WANG Hongtu,
LI Wenhua, ZENG Shunpeng & QI Zhilin (431)
- Coal and Gas Outburst Pre-Warning Technology Based on GIS
NIU Jufen & CHENG Wuyi (437)
- Video Stabilization and Target Tracking for Airship Monitoring System
ZHANG Maolei, CHEN Tao, YUAN Hongyong, YANG Rui & SHAO Quan (442)

SECTION FOUR

EMERGENCY MANAGEMENT AND EVACUATION

- Study on Emergency Management in Large-Social Activities Based on Behavior Modification Theory
JIAO Liyin & JIANG Qiuyun (451)
- Evaluation Index System for Emergency Response Ability of Metal Mine in China
WANG Han & ZHAO Chaofeng (455)
- Study of the Evaluation Index System Model of Earthquake Emergency Preparation Capability in Urban
Communities
WU Xiaotao & WU Liping (462)
- Research on Order Degree of Organizational Structure of Coal Mine Emergency Rescue System
ZHANG Junbo & YOU Bo (468)
- Research on Generation Methods of Frame of Decision-making Procedure in Emergency Decision Support
System
SHAO Quan, SUN Zhanhui, CHEN Tao & WENG Wenguo (473)
- Study on Assessment of Enterprise Emergency Capability
WEI Yu, LIU Jian, PAN Jun, TIAN Hong & WU Qiong (480)

SECTION FIVE
PUBLIC SECURITY

- Effectiveness of Evacuation in Downward Direction in a Subway Station Using Fire Dynamics Simulator
TSUKAHARA Manabu, KOSHIBA Yusuke & OHTANI Hideo (489)
- Study on the Difference in Evacuation Psychology and Behavioral Responses of Students of Different Genders in the Situation of Fire
YAN Weidong, FU Yongsheng & QIAO Qingyu (494)
- Study on Human Behaviors in Crowd Evacuation to Chinese Persons
TIAN Yumin (499)
- Disaster Risk Communication and Barrier Analysis Based on Network Framework
SHAO Guanwu, WANG Wei & DU Xin (504)
- Consequence Prediction Method of Plutonium Aerosol Dispersion for Explosive Accident
XIE Chaoyang, LUO Jingrun & GUO Lilun (511)
- Study on Experiment and Numerical Simulation of Evacuation from a Classroom under Emergent Conditions
FANG Tingyong, YU Jufen, WU Bangben & HUANG Feng (517)
- Water Quality Security Evaluation and Prevention Measures for Water Supply Reservoir
SONG Jinliang & DING Tao (524)
- Study on the Common Structures and Forms of Emergency Event Chains
LI Miao, CHEN Tao, CHEN Jianguo & YUAN Hongyong (529)
- Mechanism on Lead Poisoning from Environmental Lead Pollution in Children
XU Zhiquan, YANG Fengxia & YI Zhuwen (533)
- Spatial Distribution Study on Emergency Shelters in Beijing Urban Area
ZHOU Aihua, LI Chen, CHEN Jing & MENG Bin (539)

SECTION SIX
OCCUPATIONAL HEALTH AND HUMAN BEHAVIOR

- Improvement of Noise Performance by Optimizing Machining Process Parameters on Ball Screw
ZHANG Qi, XU Zhezhu, CHOI Chonghun, KIM Dongwook, LU Long & LYU Sungki (547)
- Testing and Analysis on Performance of PSA Filter Media Used for Bag Filter
LIANG Zhen & SHEN Henggen (555)
- Status and Prospects of Thermal Disaster Control in High Temperature Coal Mine in China
QI Yudong, CHENG Weimin, PAN Gang & WANG Gang (560)
- Research of Noise Control Technique for Gas Power Plant
YANG Jixing, JIN Longzhe, WANG Shu & YANG Fuhe (565)

SECTION SEVEN
NUMERICAL SIMULATION OF FIRE

- Combustion Rate of Medium Scale Pool Fire, an Unsteady Parameter
Benjamin TRUCHOT, T. DURUSSEL & Stéphane DUPLANTIER (575)
- Risk Prediction for Spontaneous Combustion of Sulfide Ores in Stope
YANG Fuqiang, WU Chao, PAN Wei, YE Xiaohui & CHEN Song (586)
- Effect of Slope on Smoke Propagation in an Urban Traffic Tunnel Fire
LI Yanfeng, ZHAO Mingxing, FU Chengyun, LI Junmei & FAN Hongming (593)
- Assessment of Monte Carlo Method in Calculating Radiative Heat Transfer through Glass
LI Liming, XIE Qiyuan, HUANG Dongmei, CHENG Xudong & ZHANG Heping (599)

- Research on the Characteristics of the Flow Field under Jet Fan Systems and Pacing Value of Jet Fans in Curvilinear Road Tunnel
XIE Xiaoqing, XU Zhisheng & ZHAO Hongli (605)
- Modeling and Characteristic Analysis of the Flashover of Fire in a Ship Engine Room
WANG Liang, SU Shichuan & NIE Yuhong (610)
- Fire Safety Analysis of Steel Structure in Super High-Rise Building
XU Yu & XU Zhisheng (616)
- Analysis on Subway Fire Venting Mode Based on Field and Network Simulation
WANG Binbin (623)
- Numerical Simulation on fire environment in Urban Traffic Tunnel
LI Junmei, LIU Xuan, FU Chengyun, LI Yanfeng, ZHENG Lu & ZHANG Ning (632)

SECTION EIGHT

FIRE EXPERIMENT AND PROPERTY RESEARCH

- Fire Loads Survey and Data Analysis of Commercial Buildings
YUE Hailing (641)
- Micrograph and Surface Element Analyses of Korean Pine Carbonization
LIU Ling (647)
- Effect of Ventilation on Fire Characteristics of Upholstered Furniture
ZHU Wuba & ZHANG Heping (652)
- Combustion Characteristics of Commercial Exterior Insulation Materials under Cone-radiation Condition
CUI Yu, QI Yanjun, CHENG Xudong & ZHANG Heping (657)
- Experimental Investigation on Oxidation and Spontaneous Combustion of Iron Fulvide
WANG Zhirong, JIANG Juncheng, QIAN Hailin & ZHU Boling (661)
- Exploring the Role of Melt Flow in Polymer Flammability
WANG Xuegui, CHENG Xudong, ZHANG Ruifang, ZHANG Heping & LO Siuming (668)
- Full Scale Flame Spread Test on Log Pile of Larch
XIN Ying & XUE Wei (674)
- Analysis of the Combustion Characteristics and Hazards of Typical Inflammable Materials in Hotel Room
TAN Jialei, WANG Tong, JIN Longzhe, BAI Guang & HU Bin (682)
- Experimental Study on Smoldering Combustion of Grain Byproducts
WANG Xinqun & KLEMENS R (686)
- Experimental Research on Fire Damage of Tunnel Lining Concrete Test Blocks
XU Zhisheng, XIE Baochao, DUAN Xiongwei, WU Dexing & LI Weiping (690)

SECTION NINE

SMOKE CONTROL

- Stack Effect of Smoke in an Old Apartment Staircase in Taiwan of China
SU Chung-Hwei, SHYU Ming-Jhih & HUANG Guo-Je(699)
- Evaluating Leaking Area of Enclosure from Smoke Filling
HUANG Ang, XU Zhisheng & YI Liang(707)
- Development and Trend of Aerosol Fibrous Filtration Theory
MEN Quanfu , SHU Xinqian, SHI Xicheng , DING Songtao & GONG Weili(715)
- Smoke Control of Fire in Typical Subway Station
LU Hua(725)

- Influences of Smoke Exhaust Effect by Setting Antechamber Buffer Zone in Straight Corridor of High-Rise Building
 YANG Yunchun, HE Jiapeng, XU Xiaolei & ZHOU Ru(730)
- Feasibility Analysis for “Corridor-Atria Buffer” in Smoke Control of High-rise Building
 LI Jingxian, HE Jiapeng, ZHANG Wei & ZHOU Ru(735)
- Study on Vertical Combination Smoke Control Model in High-Rise Building Fire
 ZHOU Ru, HE Jiapeng, JIANG Junchen & LI Jingxian (741)
- Model Experimental Study on the Heat Exhaust Efficiency in the Central Smoke Exhaust Mode with Independent Smoke Duct in Extra-long Highway Tunnel
 NI Tianxiao, XU Zhisheng & WU Dexing(746)
- Research on Smoke Movement in Small Radius Curvilinear Tunnel Fires
 NI Tianxiao, HE Jia & XU Zhisheng(752)
- Influence of Setting of Roof Spacer on the Smoke and Temperature in Tunnel Fire
 LI Xiubo, XU Zhisheng, ZHOU Xiangchuan & WU Dexing(758)
- Theoretical Prediction and Numerical Simulation Research of the Length of Smoke Regressing in Longitudinally Ventilated Tunnels
 XU Zhisheng, LI Xiubo, ZHOU Xiangchuan & LI Weiping(764)
- Effect of Temperature on Strength of PPS Filter Used in Flue Gas Dust Collection
 CHANG Deqiang, LIU Jingxian, MAO Ning & CHEN Baozhi(770)
- Study on Smoke Exhaust Systems for Long Highway Tunnels in Fire
 XIE Baochao, XU Zhisheng & YI Liang(775)
- Research on Smoke Spread in Qililong Navigation Tunnel
 GUO Xinjun, XU Zhisheng, LIU Guanglin & LI Weiping(783)

SECTION TEN

FIRE CONTROL AND EXTINGUISHING

- Effects of Water Mist at Different Pressures on Smoke Concentration for Corner Fire in Closed Compartment
 XIA Yunchun(791)
- Experiment on Water Mist Fire Suppression in Long and Narrow Spaces
 LIU Jianghong, ZHU Wei & LIAO Guangxuan(798)
- Study on Combustion Performances and the Thermal Stability and the Char Formation of Brominated Epoxy Resin and Sb_2O_3 in PBT
 XU Xiaonan(807)
- Study on Thermal Decomposition Kinetic of PA6 Flame-Retarded by Brominated Polystyrene Synchronized with Antimony Trioxide
 XU Xiaonan, WANG Fang & CHEN Nan (812)
- Discussion on Cooling Water Supply Strength for Tank Fire
 YANG Sufang(819)
- Experiment Study on Water Mist to Extinguishing Gas Combustion Flame
 PAN Rongkun, YU Minggao, LIU Zhichao & CHU Tingxiang(824)
- Application of DEA Theory in Performance Evaluation of Public Security Fire-Control
 TANG Minkang, ZENG Chunming & CHEN Juanjuan(829)
- Fire Flame Image Segmentation and Its Geometry Comparative Analysis
 DING Xiebin & HOU Zunze(835)
- Application of Image Texture Features in Fire-Detection System
 CHEN Xiaojuan, BU Leping & YANG Jiajun(841)

Cable Tunnel Fire Detection Technologies Research

XING Yi, WEI Guangchao, LIU Min & CHENG Tiehua(846)

Application of Inert Gas Injection to Mine Fire Rescued

ZHANG Jiuling, ZHOU Xinquan, GONG Wu & WANG Yuehong(852)

Automatic Fire Alarm System Design for Large-Scale Steel Structural Industrial Buildings

CHEN Jibin, CAO Xianghong, WANG Jinzhuang & ZHANG Hua(857)

Study on the Design of Automatic Fire Protection Equipment in the Airport Terminal

XIE Xiaoqing, XU Zhisheng & SHI Lei (863)

Study on Early Detection of Smoke in Compartment of Soft Sleeper Car

WANG Gang, LIANG Shimin, ZHENG Xiaofeng & LIU Fusheng(867)

Design of Flue Fire Extinguishing System for Catering Industry

QU Fang, SHANG Sanlou, XIE Zhengwen, YUAN Qiao & ZHANG Long(872)

Mathematical Model of Heat and Mass Transfer within Fabric used for Fire Protective Clothing under High Temperature Conditions

ZHU Fanglong & GU Bohong(877)

Fire Laws and Evacuation Style in the Fuchun River Navigation Tunnel

XIE Baochao, XU Zhisheng & CHEN Changkun(883)

The Setting of Evacuation Passageways and Evacuation Analysis in Navigation Tunnel Fire

XU Zhisheng, GUO Xinjun, LIU Guanglin & LI Weiping(891)

SECTION ELEVEN

FIRE EXTINGUISHING AGENT AND FIRE EQUIPMENT

Performance of Point Type Smoke Detectors in ISO Fire Tests under Different Altitude Areas

TU Ran, YU Chunyu, Chen Hong, FANG Jun, WANG Jinjun & ZHANG Yongming(903)

Development of New Effervescent Atomized Water Mist Fire Protection System

XU Fang, WEI Dong & LIANG Qiang(909)

Research of a New Kind and High Efficient Fuel-Air Explosion Suppressant Based on Cold Aerosol

JIANG Xinsheng, WANG Dong, DU Yang, OU Yihong, LIANG Jianjun, & GAO Jianfeng(915)

Modeling Heat Transfer in Phase Change Material Bedded Firefighting Protective Clothing under Fire Exposure

HUANG Dongmei, LI Ying, LI Liming, TONG Lin, YANG Hua & ZHANG Heping(921)

Application of G3/6 Fire-extinguishing Foam in Blasting Driving Roadway

GAO Yukun, ZHANG Yinghua, HUANG Zhian, DING Guanghua & ZHANG Xiaobo(927)

SECTION TWELVE

EXPLOSION PERFORMANCE AND SAFETY OF HAZARDOUS MATERIALS

The Integration of Process Safety into a Chemical Reaction Engineering Course: The Review of the T-2 Incident

Ronald J. WILLEY, Scott H. FOGLER & Michael B. CUTLIP (935)

Flash-Point Prediction of Miscible Mixtures by UNIFAC Approach

LIAW Horng-Jang & LI Yi-Hua (944)

Prediction of Flash Points of Organosilicon Compounds

CHEN Chan-Cheng, LIAW Horng-Jang & TSAI Yi-Jen (951)

A Model to Estimate the Inert Dilution Effect on the Flammability Limits

LIAW Horng-Jang, CHEN Chan-Cheng & CHANG Chih-Heng(963)

Explosion Protection and Risk Assessment: Application of ATEX Directive to a Refinery Plant

BEVILACQUA M & CIARAPICA FE (974)

- Experimental Study of Explosion Properties of Flammable Organic Vapors in Nitrous Oxide Atmosphere
KOSHIBA Yusuke, TAKIGAWA Tomihisa, MATSUOKA Yusaku & OHTANI Hideo (981)
- Auto-Ignition Temperature of Butane and LPG at Elevated Pressures
Frederik NORMAN, Filip VERPLAETSEN & Jan BERGHMANS(987)
- Numerical Study of Liquefied Petroleum Gas (LPG) Vapor Cloud Explosion in Enclosed Car Parks
ZHONG Peng, VAN DEN SCHOOR Filip & VAN DEN BULCK Eric(994)
- 100% Pure Adiabaticity: Realized with the Differential Adiabatic Calorimeter
Frank WU(1007)
- Thermal Kinetic Study of Dicumyl Peroxide by Using Non-Parametric Kinetic Method
ZANG Na(1012)
- Risk Assessment of Dangerous Chemical Tanker Car Accident Based on Analytic Hierarchy Process
REN Shaoyun(1018)
- Effect of Micro Amount of Fe^{3+} on Thermal Explosion Decomposition of Hydrogen Peroxide
LIU Huiping, ZHU Peng, ZHOU Bo, LIU Zhangrui & LIU Yingxue(1023)
- Methods of Forecasting and Evaluating Fire and Explosion Hazards of Mixed Dangerous Substances
LI Jianhua & HUANG Zhanghua(1030)
- Experiment Study on Influence of Size Distribution and Concentration on Magnesium Powders Explosion
YUAN Chunmiao, LI Chang, LI Gang & ZHANG Peihong(1035)
- Decisive Factors and Model Studying of LNG Explosive Boiling on/under Water
ZHANG Bin, WU Wanqing & FENG Xing (1040)
- Comparison and Analysis of Different Small Scale Experiments on Boiling Liquid Expanding Vapor Explosion
SHI Jianyun & PAN Ke(1046)
- Safety Test and Evaluation of High-Blast Power Flux Materials
ZUO Jun, LIU Xiaobo & WU Kuixian(1054)
- Experimental Research on Coal Dust Explosion Propagation
DUAN Zhenwei, JING Guoxun, ZHANG Di & CHENG Lei(1058)
- Study on Thermal Hazard of Cyclohexanone Peroxide
ZHU Peng, LIU Huiping, ZHOU Bo, LIU Zhangrui & LIU Yingxue(1064)
- Measurement and Analysis of Intensity of Dust Deposition and Research on Prevention Measures
LIU Jian, YAO Haifei, WEI Chuanguang & JIN Longzhe(1071)
- Mechanism and Influence Analysis on Explosion of Molten Aluminum Meeting Water
XIE Zhenhua, YANG Ming & ZHANG Wei(1077)
- Correlation Analysis among Adiabatic Exothermic Characteristic Parameters
JIAO Aihong & FU Zhimin (1083)
- Cook-off Test of Exploding Foil Initiator
DU Zhenhua, ZHANG Rui, TONG Honghai & CHU Enyi(1089)
- Explosion Characteristics of Aluminum Dust in Confined Space
YU Jianliang & CHEN Ling (1093)

SECTION THIRTEEN

BLAST SAFETY

- Blast Analysis of a Typical Reinforced Concrete Building of Riyadh
TH ALMUSALLAM, HM ELSANADEDY, H ABBAS ,
P MENDIS, T NGO, SH ALSAYED & YA AL-SALLOUM(1101)
- Harmfulness and Control Measures of Air Shock-wave Induced by Building Demolition Blasting
CHI En'an & ZHANG Yiping(1113)

Study on the Effects of the Wavelet Transform-Based Air Compartment on the Decay Pattern of Underwater Explosion Signals

JIA Hu, SHEN Zhaowu, MA Honghao & FAN Zijian(1118)

Experimental Study on Collapse Vibration Simulation of Demolition Blasting

SHI Jianjun, GAO Qian & MENG Haili(1124)

Demolition of High-temperature Furnace Lining & Clinker in Hot Metal Mixer through Controlled Blasting

XU Shunxiang & CHEN Dezhi(1130)

Experimental Investigation into Impact Properties of Confining Pressure Rock

GAO Fuqiang, HOU Aijun, YANG Jun & YANG Xiaolin(1134)

Explosion Resistance Investigation into Sandwich Structure of Steel Fiber Reinforced Concrete Support Plate

WANG Xinwu, WEI Mingshan, DING Qiaoai & REN Huiqi(1140)

SECTION FOURTEEN

GAS EXPLOSION AND SAFETY

The Spatial and Temporal Distribution of Temperature of Air After Methane Explosions

DUAN Yulong, ZHOU Xinquan, YU Minggao & WU Caihong(1149)

Process Analysis of Gas Explosion with Local Filling

LI Haichen(1161)

Numerical Simulation of Explosive Characteristics and Rules of Gasoline-Vapor Based on Mechanism of Detailed Chemical Reaction Kinetics

CHEN Siwei, JIA Shengming, JIAO Guangwei, TANG Yongyong & DU Yan(1161)

Experimental Study on Methane Explosion Propagation in T Type Duct and Its Theoretical Analysis

YE Qing, LIN Baiquan & JIA Zhenzhen(1166)

Research and Application of AHP-GT Model of Gas Explosion Accident Evolution Risk Assessment in Coal Mine

SHI Shiliang, LI Runqiu & LIU Yong(1171)

Characteristics and Cross-Coupling Laws of Gas Explosion Accidents in Coal Mines

LI Runqiu, SHI Shiliang & LUO Wenke(1177)

Overpressure Distribution Prediction of Mine Gas Explosion Based on BP Neural Networks

WANG Yajun, YANG Yingdi & LI Jiangtao(1184)

Experimental Study on Character about Shock Wave of Gas Explosion via Pipeline Corner

JIA Zhiwei, LI Shengxin & JING Guoxun(1189)

Propagation Characteristics Numerical Experiment of Gas Explosion Shock Wave under the Pipe Bend

JIA Zhiwei, YANG Ming & JING Guoxun(1193)

Modified Gaussian Model for Natural Gas Steady-state Diffusion

YANG Yan, LI Zili & ZHANG Zibo(1198)

Experiments on Flame and Shock Wave Propagation in a Parallel Tunnel in Underground Coal Mines

ZHU Chuanjie, LIN Baiquan, LU Zhenguo, JIANG Bingyou & LIU Yang(1204)

Experimental Research on Gas Explosion Venting of Premixed Gases in Linked Vessels

WANG Zhirong, YUAN Ying & JIANG Juncheng(1209)

Flame Propagation and Overpressure of Gas Explosion in Coal Laneways

ZHANG Zengliang, LIN Baiquan, YANG Wei & LI Gemei(1214)

Numerical Study on Inhibition Gas Explosion in Pipeline with Porous Materials

YU Jianliang & GAO Yuan(1219)

Numerical Study on Premixed Methane-air Deflagration in Closed Cylindrical Vessel

BI Mingshu & DONG Chengjie(1225)

Study on the Explosion Limit of Natural Gas at High Temperature and High Pressure

LIU Haiying, QIAN Xinming, HUANG Ping & LIU Zhenyi(1230)

SECTION FIFTEEN

LEAKAGE OF COMBUSTIBLE AND TOXIC MATERIALS

Dispersion in Confined Building: a Coupled Approach

TRUCHOT Benjamin & DUPLANTIER Stéphane (1239)

Simulation Analysis for Nitrogen Tetroxide Leaking Dispersion under the Pouring Condition

HUANG Zhiyong, JIN Guofeng, CHEN Xing, PING Yanbing & WANG Xuanjun(1251)

Application of Computational Fluid Dynamics for Manufactured Gas Dispersion Modeling and Leakage
Consequence Analysis

SUN Hao, NING Ping & TANG Lei(1257)

CFD Simulation for the Dense Gas Dispersion in Plateau Mountainous City

ZHANG Chaoneng, NING Ping, MA Caixia & SUN Hao(1266)

Calculation of Dispersion High Consequence Radius of High-Sulfur Gas in Little Wind or Windless Condition

WU Xia, LIAO Kexi, LI Changjun & JIA Wenlong(1271)

SECTION SIXTEEN

SAFETY OF CHEMICAL REACTION TANK AND PRESSURE VESSEL

Experimental Investigation and Numerical Simulation of Gas Explosion in Linked Vessels

YOU Mingwei, JIANG Juncheng & YU Yuan(1279)

Analysis of Risk Factors of Operations in Confined Spaces

HUANG Zhanghua & LI Jianhua(1284)

Influencing Factors Analysis on Infrared Detection of Pressure Vessels Defect with External Thermal Excitation

LI Dong, XING Chang, SONG Fenfen & WU Guozhong(1290)

Investigation on Impact Probability between Fragments from Horizontal Cylindrical Vessel Explosion and
Spherical Objective

SUN Dongliang, JIANG Juncheng, ZHANG Mingguang & WANG Zhirong(1296)

Research on Explosion of Quick Actuating Pressure Vessels While Opening with Residual Pressure

SHENG Shuiping, LIU Yanlei, HAN Shuxin, HE Chengdai, CHEN Haiyun & WANG Fei (1303)

Mechanistic Study on FeS Oxidation

ZHAO Shengping & JIANG Juncheng(1307)

Research on Test about Stress Corrosion Cracking of 16MnR Spherical Tank

KONG Fanyu(1312)

Study on Crack-Driving Force of CO₂ Pipelines

WU Xia, LI Changjun, JIA Wenlong & YANG Yu(1317)

Analysis of Failure Assessment Techniques of 15MnMoVN Steel Pressure Vessels

YUE Yingjuan, LIU Jianliang, LIU Yan, CHEN Fei, ZHOU Kai & HUANG Xin(1322)

CONTENTS

Part B

SECTION SEVENTEEN

PERFORMANCE AND PROCESS OF BURNING

Experiment Research on the Characteristics of Straw Combustion

LU Chang, MENG Die & YU Minggao(1329)

Study on the Characteristics of Laminar Premixed Flame and NO_x Emission in Methane-Hydrogen-Air Mixture

NIU Fang, LIU Qingming, HE Xueqiu & BAI Chunhua(1334)

SECTION EIGHTEEN

WORK SAFETY IN COAL MINE

Technology Study and Practice on Safe Simultaneous Mining of Ultra Short Distance Seams

YANG Bensheng, QIAO Yanguo, LUO Feng & LIU Chao(1343)

Studies on the Mechanism of Mining Fault Activation and Method of Safe Protecting Coal Pillar Design below the Village

YU Xueyi, HUANG Guoyao, ZHAO Bingchao & WANG Nianqin(1348)

Study of the Risk of Hydraulic Fracturing Technology and the DBFP Technology

YANG Wei, LIN Baiquan & JIA Lili(1354)

Study of the Mine RFID-Based Personnel Positioning System

WANG Yunjia, WANG Xiaohui & ZHANG Kefei(1360)

Investigation into Coal Pillar Stability Affected by Mining Induced Stress Development within Different Coal Pillar Widths in Deep Mining

YANG Ke, XIE Guangxiang & CHANG Jucai(1368)

Numerical Simulation of Protective Coal Pillar Setup in Open-Underground Combined Mining

XUE Juntao, LI Sheng & YI Zhihui(1374)

A Structural Equation Model for Analyzing Underground Mine Safety

LI Zhongcai, CHEN Zhangliang & SUN Yufeng(1380)

Direct Method of Determining Gas Content of Guqiao 13th Coalbed

WANG Gang, CHENG Weimin, XIE Jun & ZHOU Gang(1384)

SECTION NINETEEN

SPONTANEOUS COMBUSTION IN COAL MINE

Simulation on Influencing Factors of “Three Zone” Distribution in Goaf of top Coal Caving Face

LAN Zequan, MA Hanpeng, YAO Jian & Li Qizhong(1393)

Experimental Study on Performance that Ammonium Salt Retarder Inhibits Furong Coal Oxidation and Spontaneous Combustion

ZHENG Lanfang(1398)

Prevention and Practice of Spontaneous Combustion of fully Mechanized top Coal Caving Face in High Gas and Easy Self-Ignition Coal Seams

CHU Tingxiang, DONG Yanjun, PAN Rongkun, YU Minggao & JIA Hailin(1402)

Research on Partition of Spontaneous Combustion Danger Zone in Fully Mechanized Gob under Condition of Gas Drainage

ZHU Yi(1409)

Numerical Simulation of Influence of Coal Spontaneous Combustion on Flow Field in Roof Falling Zone in Coal Mine

ZHU Yingchun & ZHOU Xinquan(1415)

Study on Three-Zone in Coalmine Goaf Based on MATLAB

JIA Hailin, CHANG Xuhua, CHU Tingxiang & LU Laixiang(1422)

Effects of Cover Made of Fly Ash for Controlling the Harm from Coal Waste

MA Baoguo & HU Zhenqi(1427)

Experimental Study on the Radon Migration in Coal Spontaneous Combustion

LIU Yan, REN Fenhua & WANG Junfeng(1431)

Application of Finite Volume Method on Temperature Field Simulation in Goaf

WANG Yuehong, QIN Yueping, ZHANG Jiuling & QIN Chuan (1437)

Numerical Simulation of Spontaneous Combustion of Isolated Island Coal Pillar

TAN Bo, SONG Yimeng, LIU Xingkui & WANG Heng(1443)

Numerical Study on the “Three Zones” Distribution of Spontaneous Combustion due to the Residual Coal Oxidation in Goaf

LIN Lifeng, JIA Baoshan, LI Yanhong & WANG Yinghua(1448)

Experimental Study on the Characteristic of Oxygen Consumption of Coal at Low-Temperature Oxidation

ZUO Qiuling, ZHANG Jianguo & WANG Guoji(1456)

SECTION TWENTY

GAS AND DUST CONTROL IN COAL MINE

Experimental Study on Biodegradable Drilling Fluid of Gas Drainage Drilling in Unconsolidated and Soft Coal Seam

CAI Jihua, GU Sui & LIU Hao(1463)

Numerical Simulation Study of Liquid-Solid Coupling of Coal Seam Water Infusion

MENG Junqing, NIE Baisheng, WANG Yang, WANG Chao, YANG Hua & WANG Longkang(1470)

Study of Gas Migration in Mechanized Mining Gob

Xu Mangui, Li Li, Lin Haifei, Pan Hongyu & Ren Hongan(1475)

Structure Design, Numerical Simulation and Experimental Research of a New Type of Mine Dust Collector

ZHANG Mingxing, CHEN Haiyan, YAN Cuiping & LIN Longyuan(1481)

Exploration of Gas Drainage Technology in Coal Mine Safety Application

ZHU Hongqing, LIU Xingkui, ZHANG Shengzhu & ZHANG Minbo(1487)

Numerical Simulation of Gas Drainage with Boreholes in Goaf

YAO Wei1, ZHANG Jun, YANG Jixing, WANG Sheng, LI Jing & JIN Longzhe(1493)

Experimental Study of Carbon Monoxide Adsorption and Desorption in Different Coal

XIAO Cangyan, GUO Liwen, CHEN Shuzhao & HAN Xiuli(1499)

Contour-Based Visual Expression of Gas Geological Information

HAO Tianxuan, SHAO Yang & SHI Ling(1505)

Analysis of Influence Factor of Residual Gas Content

LIU Xiaoli, ZHANG Zhiye&WANG Yuehong(1509)

Prevention and Control for Coal and Gas Outbursts Based on System Safety Management

WANG Kai, ZHOU Aitao, JING Guoxun, ZHANG Jianfang & QIN Chuan(1514)

Research on Pore Characteristics of Hard and Tectonic Coal of Anthracite in Jincheng with Mercury Intrusion Method

WANG Zhaofeng, QI Lingling, YANG Hongmin & CHEN Xiangjun(1520)

- Study on Existing Form of Low Molecular Weight Compounds in Deformed Coal
HOU Jinxiu, ZHANG Jinchun & ZHANG Yugui(1525)
- Numerical Simulation Analysis on Swirl Water Jet Flow Field
LIU Jian, WU Yinwen, YAO Haifei & JIN Longzhe(1530)
- Experimental Study on Transmission Characteristics of Coal Dust Explosion in Confined Laneway Space
CHENG Lei, JING Guoxun, YANG Shuzhao & DUAN Zhenwei(1536)
- Analysis of Gas Accumulation Hazard Induced by Emergencies in Partial Space of Roadway and Its Application
SUN Ruoshan, LI Changhai & CAO Tao(1541)
- Key Technologies of Exhausting and Mining Gas in Mines By Hydraulic Fracturing on the Ground
NI Xiaoming, YANG Chunli, SU Xianbo & CHEN Peng(1547)
- Experimental Study on Methane-Coal Dust Mixture Explosion Mitigation by Ultra-Fine Water Mist
XU Hongli, WANG Xishi, GU Rui & ZHANG Heping(1552)

SECTION TWENTY-ONE **COAL, GAS AND ROCK BURST**

- Adsorption Experiment of Coal to Methane in Vibration Field
LI Xiangchun, NIE Baisheng, HE Xueqiu, Ding Yongming & ZHANG Xiang(1561)
- Calculation of Coal Seam Permeability and Gas Pressure Based on Borehole Gas Emission Law Back Analysis Model
XU Gang, JI Chaohui & DENG Xubiao(1565)
- Research on Relationship between Movement of Surrounding Rock and Gas Emission in Working Face
WANG Wen, XIONG Zuqiang, LI Huamin & LI Dongyin(1570)
- Affect Analysis on Destroy Form about Overburden by RRL and RRM on the Condition of Shallow Coal Seam
ZHAO Bingchao, YU Xueyi, HUANG Guoyao & ZHAO Guoliang(1576)
- Research on Active Faults to Predict Coal and Gas Outburst
LAN Tianwei, ZHANG Hongwei, HU Yonglei, LIU Jun(1581)
- Investigations on Nonlinear Theory of Coal and Rock Damage and Fracture
WANG Li, YANG Xiaobin, QIN Yueping & LIU Wei(1585)
- Study on Rock Pressure Deep Coal-seam Working Face
XIAO Fukun, ZHAO Xiangshun & GE Zhihui (1591)
- Time Series Analysis about Gas Emission of Working Face Based on the Coupled Model of Chaos and Neural Network
HE Liwen, SONG Yi, SHI Shiliang & LIU Zhengcai(1599)
- Analysis for Nonlinear Dynamics Phenomena in Gas Calamity Process
HE Liwen, SONG Yi, SHI Shiliang & LIU Zhengcai(1605)
- Analysis on Slip Law of Slope Rock Mass in Loess Basement Open-pit Dumping Site
JIA Lan, CAO Lanzhu & SONG ZiLing(1613)
- Numerical Simulation Research on Surrounding Rock Activities in Shallow Coal Seam Face
CHEN Ying, YU Lei & LAN Tianwei(1618)
- Distribution Laws of Abutment Pressure Around Coal Faces
WANG Dong, DUAN Kexin & WANG Meng(1623)
- Numerical Research on Top Coal Movement, Failure Mechanism and Supports' Stresses Characters of Fully Mechanized Top-Coal Caving in Steep Thick Seam
MIAO Shengjun, WANG Shuren & LI Yuan(1627)

Preliminary Evaluation of the Coal-Gas Outburst Hazard of No.13 Coal Seam in Wangfenggang Mine, Huainan Coalfield

LI Junqian, LIU Dameng, YAO Yanbin & CAI Yidong(1632)

Differences Research of Space Variability of Parameters on Surrounding Rock Deformation of Deep Laneway

ZHANG Peisen & YAN Wei (1639)

Research on SVM for Analyzing Coal-Gas Outburst

SUN Yufeng, LI Zhongcai & CHEN Zhangliang(1644)

Rheological Analysis of Preventing Coal and Gas Outburst for Excavation Coal Face

WANG Yungang, LIU Yanwei, WEI Jianping & LIU Mingju(1651)

Experimental study on characteristics of methane adsorption - desorption on No. 3 coal seam in Yangquan

XIAO Zhiguo & WANG Zhaofeng(1656)

Experimental Study on the Micro-Porous Characteristics and Permeability of Coal Rocks of an Outburst Coal Mine

ZHANG Tianjun, LI Shugang & ZHANG Taowei(1662)

Application of In-situ Stress Measurement on Coal and Gas Outburst Regional Prediction

SONG Weihua & ZHANG Hongwei(1667)

Tendency Identification of Rockburst in Underground Engineering Based on Extension Theory of Dynamic Weight

LI Kegang(1672)

Dynamic Loading of Expansive Agent Simulating Coal and Gas Outburst

LAN Chengren, LUI Xiujiang, DING Huizhe & GENG Meihua(1677)

SECTION TWENTY-TWO

VENTILATION

Optimization of Mine Ventilation System Based on Grey System Theory

SA Zhanyou, WANG Yong, ZHANG Haining, SONG Hui, LI Feng(1683)

Interactive Collection and Processing Technology of Mine Ventilation Network Information

YANG Yingdi, ZHANG Guoshu, QIN Ruxiang & QIU Jinwei(1688)

Research on Calculation of Roadway Friction Resistance of Mine Ventilation

MA Heng, SHANG Dajun & LIU Jian(1695)

Visual Simulation System of Mine Ventilation Based on OpenGL

NI Jingfeng & DUO Yili(1700)

Numerical Analysis and Application of Ventilation Network Stability Judgment Based on Lyapounov Theory

ZHU Hongqing, GUO Aidong, SONG Zeyang, XU Yuanfeng & MENG Jie(1704)

A Gray System Method to Deal with Gross Error in Mine Ventilation Resistance Measurements

QU Fang & YU Shenshen(1709)

Methods of Airflow Sensitivity & Transfer Function for Multi-fan Combined Operation

CHEN Kaiyan & SI Junhong(1714)

Research and Application of Online Monitoring Technology of Ventilation Network in Coal Mine

YANG Shouguo, TANG Jianxin, WEN Guangcai & ZHAO Xusheng(1720)

SECTION TWENTY-THREE

BRIDGE SAFETY ENGINEERING

Evaluation of Load Carrying Capacity of Bridge Using FE Model Updating Based on Ambient Vibration Data

LEE Jong-Jae, PARK Young-Soo, LEE Chang-Geun, CHO Soojin & JIN Seung-Sup (1727)

Safety Testing and Assessment of Existing Reinforced Concrete Plate Girder Bridges Before and After Rehabilitation

LI Guibing, ZHANG Aihui & GUO Yugang(1736)

Evaluation Methods of Bridge Response to Earthquake

HAN Yan & XIA He(1743)

A Improved Similitude Law Study on Dynamic Ice Force Model Experiment for Ice- Pier Induced Vibration

JIA Lingling, LIU Chunguang & HAN Yang(1750)

Investigation on Seismic Response of Continuous Skew Bridges

HE Jian & YE Aijun(1756)

Study on Conceptual Design of Cable-Stayed Bridges Based on Modal Analysis

FU Fang, ZHAO Chenggang, WANG Dongwei & Zhang Xinhua(1762)

Degradation Mechanism of Reinforced Concrete Beams under Multi-Field Coupling

ZHENG Xiaoning, DIAO Bo, SUN Yang & ZHANG Jian(1768)

SECTION TWENTY-FOUR

DAM SAFETY

Fuzzy Comprehensive Evaluation of Dam Safety

ZHENG Fugang & LIU Xing (1777)

Analysis on Seismic Safety of RCC Gravity Dam with Cutting Transverse Joints

HUANG Yisheng(1784)

SECTION TWENTY-FIVE

FATIGUE, LIFETIME AND RELIABILITY

Life-Span Estimation Analysis Based on Failure Mechanisms (LEAF)

Eiji O'SHIMA (1793)

The Study on Optimization of Gear Micro-Geometry for Gear Durability

ZHANG Qi, XU Zhezhu, KIM Dongwook & LYU Sungki(1801)

Detection of Thermal Fatigue in Composite Laminates Using Nonlinear Ultrasonic Guided Wave

Weibin LI, Younho CHO, Taeho JU,

Jan D. ACHENBACH & Heung Soap CHOI(1806)

Synthesized Analysis Method of Structural Durability and Damage Tolerance Based on Reliability

ZHAO Weitao & ZHANG Xu(1803)

Safe Life Estimation of Coke Drum in Service Environment

LI Zhen, XUE Zhou, WANG Xu & LI Fenkun(1820)

New Method for Failure Assessment of Cracked Pipeline

BAI Yongqiang, WANG Tong, LÜ Lianghai, SUN Liang & SHUAI Jian(1827)

Application of Strain Time Histories Measurement in Fatigue-Load Model of Highway Bridges

YUE Feng, REN Xiaosong, MIAO Yanyan, CHEN Min, LI Mengyuan & HAO Zhigang(1832)

Effect of Protecting with Conduits on Insulation Failure of YJV Cable

SHU Zhongjun, SUN Qinghui, CHEN Nan & YANG Shousheng(1838)

Effects of Peak Load Boiler on Reliability of Heating Network System

ZHENG Xuejing & YU Jie(1845)

Determination of Reduction Factors to Helicopter Dynamic Components

MU Zhitao, LIU Wenlin, YU Dazhao & ZHOU Kai(1850)

Effect Study of D-Optimality-Based Sensitivity Test's Distributing for Reliability Evaluation

LI Fang, ZHANG Rui, FU Dongxiao & DU Zhenhua(1856)

- The Storage Aging Analysis of Electric Initiator by Aging Test
ZHANG Rui, LI Geng, LI Fang & FU Dongxiao(1861)
- The Ultraviolet Durability of TiO₂ Coated Kevlar Fibres
CHEN Wei, QIAN Xinming, HE Xueqiu, LIU Zhengyi & LIU Jiping(1865)
- Fatigue Assessment of Welded Structure Based on Measured Dynamic Stress and IIW Standard
DING Yanchuang, GUO Jinying, WANG Jintian & ZHAO Wenzhong(1870)
- A Reliability Assessment Method for Complex System Based on Information Conversion and Fusion Technologies
YANG Qing, TENG Haishan, GUO Kui & GAO Bin(1876)

SECTION TWENTY-SIX

TRAFFIC AND TRANSPORTATION SAFETY

- Case Study of Mast Damage on Board of Tall Ship POGORIA
TARELKO Wieslaw (1885)
- Analysis of Driver's Behaviour in Road Tunnels: a Driving Simulation Study
Alessandro CALVI (1892)
- Overview of Methods on Modeling Risks of Ship in the Presence of Bridge
XIAO Fangliang, ALE Ben & JAGTMAN Ellen(1905)
- Some Thoughts on Fatal Road Accidents
ROHÁCS József & PALME Rudolf (1917)
- Non-Cooperative Target Classification to Improve Safety on Airport Approach and Departure Domain
ROHÁCS József, PALME Rudolf & SIKET Zsolt(1931)
- Dynamic Target Values of the Indicator Road Fatalities in the Framework of the European Road Safety Policy
A. TOLÓN-BECERRA, X. LASTRA-BRAVO & F. BIENVENIDO-BÁRCENA (1945)
- Detecting and Analyzing of Vehicle Front Wheel Alignment Based on Safety
QIAO Xiangming, XU An & HUA Xianggang(1953)
- Analysis on Passenger Car Brake Safety Performance
XU An, QIAO Xiangming & ZHAO Changli(1957)
- Characteristics of Pedestrian Walking Speeds in Sidewalk in Xi'an of China
YAO Zhigang & TAN Yong (1961)
- Pedestrian Refuge Island in the Improvement of Pedestrian Crossing Safety
QIU Dongdong, LU Jian, SHI Haijun & XU Qing(1967)
- Study on Critical Speed and Permissible Speed of Train Derailment
ZHOU Zhihui, QIN Wenxiao, ZHANG Jun, HE Dan & ZENG Qingyuan (1972)
- Attribute Recognition Model for Rural-Urban Binding Region Traffic Safety Evaluation Based on Combined Weight on Principle of Relative Entropy
WEI Qun & MOU Ruifang (1977)
- Modeling Unsafe Behavior of Electric Bicycle Based on Theory of Planned Behavior
DU Xuan, REN Gang & WANG Weijie(1983)
- Bayesian Network Coupled Model for Safety Evaluation of Two-lane Highway
CHEN Peiyuan, CHEN Fujian & LI Zhijie(1988)
- Dynamic Grey Markov Model for Forecasting Railway Train Accidents
LI Bo & MI Huali (1994)
- Unsafe Bicycle Riding Behavior Improved Model Based on the Theory of Planned Behavior
ZHANG Lei, REN Gang, GU Cheng & WANG Wei (2000)

- Conceptual Design of Behaviour-Based Traffic Safety Evaluation and Decision Support System
ZHOU Zhuping, REN Gang, ZHANG Yong, XU Chengcheng & HE Kangkang (2007)
- Combined Forecast of Runway Safety Performance for Civil Aviation of China
HUO Zhiqin, RU Yi & HAN Songchen (2016)
- Study on Emergency Vehicle Dispatching for Serious Traffic Accidents Scene Disposal
JIA Yongxing, REN You, XU Hongguo, LIU Hongfei & YANG Mingtao(2024)
- Numerical Simulation of Wheel Wear and Its Influence on Vehicle Dynamics
LUO Ren & ZENG Jing (2030)
- Influence of Partial Load on Ride Quality of Vehicle
CHI Maoru, GUO Wenhao, ZHANG Weihua & ZENG Jing(2036)
- Traffic Diversion Method of Regional Highway Network after Unexpected Traffic Incident
LI Wenhua, HU Xiaojian, LU Jian & ZHANG Qi (2041)
- Route Congestion Assessment Based on Multi-level Fuzzy Evaluation
ZHAO Yifei, SHI Yongliang & YUE Rentian (2047)
- Study on Camber Deformation and Safety Countermeasures of Shanghai-Hangzhou Passenger Dedicated Line
LUO Junli, XU Zhisheng, FAN Chaoyuan, YANG Jihao & SONG Chengchao (2052)

SECTION TWENTY-SEVEN

CONSTRUCTION AND BUILDING SAFETY

- Interaction Characteristics between Double Twisted Hexagonal Wire Mesh and Red Sandstone Backfill by Pullout Tests
LI Yun, YANG Guolin & LIN Yuliang(2059)
- Construction Safety Performance Analysis of Large-Span Simple-Supported Bridge
YAN Zhigang (2066)
- Effect of Vertical Loads on the Lateral Bearing Behavior of PHC Pipe Piles
ZHOU Wanqing (2072)
- New Algorithm for Calculating Heat Transfer in Cavities of Hollow Core Concrete Slabs Exposed to Fires
LIU Yongjun, LI Guangyue & SONG Yansheng (2076)
- Study on Fire Behavior of Near Surface Mounted CFRP Laminate Strips Strengthening Concrete Beams
LIU Yongjun, JIA Lianguang & WANG Yu (2081)
- Adjacent Shallow-Buried and Mined Tunnel Building Safety Assessment in Complex Surrounding
YANG Bingming, LIU Baoguo, DONG Xiaoming & ZHANG Sulei (2085)
- Analysis and Control of Ground Buildings Safety Risk in Complex Urban Tunnel Excavation
HOU Yanjuan, ZHANG Dingli & ZHANG Bingyin (2090)
- Influences of Cooling Methods and Standing Time on Residual Compressive Strength of Concrete after Elevated Temperature
JIA Fuping, LÜ Henglin, ZHANG Yu, WANG Yongchun & CHENG Yong (2097)
- Research on Seismic Performance of the Braced Steel Frame with Wedge Devices
LEI Jinsong, ZHANG Ling, YIN Wenzhi & MA Qing (2103)
- Finite Element Analysis on the Mechanical Behaviors of Load-Bearing and Anti-Slide Piles
ZHANG Guodong, REN Qingfang, JIN Xing & CHEN Fei (2111)
- Characteristics of Multi-Storied Brick-and-Concrete Buildings Response to Tunnel Blasting Earthquake
CHEN Lianjun, WANG Hailiang & GAO Tongwei(2117)

SECTION TWENTY-EIGHT

SLOPE STABILITY

- Monitoring of Compression Anchors in Rock Slope Stabilization
CHEN Guozhou, ZHANG Jianxun & JIA Jinqing (2125)
- Study on Similar Materials Proportion of Landslide Model Test
CHENG Shengguo & GU Jianyun (2130)
- Research on Multi-Object Fuzzy Optimization Decision of Slop Safety Treatment Scheme
ZHU Qikun, QIN Wen, CHANG Yufeng & JIA Pei (2134)
- Relationship between Shear Strength and Fabric of Unsaturated Granular Soils
ZHANG Weihua & ZHAO Chenggang(2141)
- A Bayesian Network Model for Calculating Reliability of Major Slope Enforcement Project
CHEN Fujian, HUANG Shibin & BAO Huiming(2146)
- Effect of Sampling Depth on the Slope of Rock Mechanics Parameters
CHEN Shuzhao, CAI Qingxiang, XIAO Cangyan & SHU Jisen (2150)
- Numerical Simulation of Slope Stability under Combined Surface and Underground Mining
CAO Lanzhu, WANG Dong & SONG Ziling(2155)
- Study of the Stability of a High Steep Slope Due to Underground Mining
SONG Weidong, WU Shan, DU Jianhua & WANG Xin (2161)
- Parametric Study on Stability of Unsaturated Homogeneous Soil Slope under Rainfall
XU Jin & ZHANG Jiasheng (2169)
- Study on Boundary Effect of Two Dimensional Landslide Model Test
XIANG Xianchao, JIANG Guosheng & Yuan Heng (2176)
- Safety of Seepage Field of Yellow River Levee Slope under Flood and Rain
WANG Junmei, NAN Dongmei & LIU Haining (2182)
- Assessment of Slope Stability Based on the Transferable Belief Model
XU Xiaobin, XIA Bingduo & WEN Chenlin(2189)
- Analysis on Stability of Liner System Located in Slope of Municipal Solid Waste Landfill
LIU Xiaoli, SI Wenjing, ZHU Chunying & YU Wei (2198)
- Analysis on Influence of Permeability Coefficient on Slope Stabilityof Landfill in Rainfall
LIU Xiaoli, SI Wenjing, GAO Yingfu & ZHU Chunying (2203)
- Risk Study on Softsoil Subgrade Settlement and Embankment Jitter of Shenhai Expressway
LI Jun, LUO Chengcai, XU Zhisheng & LI Weiping (2208)

SECTION TWENTY-NINE

SAFETY OF TUNNEL AND METRO CONSTRUCTION

- Study on Ground Deformation and Lining Stress Characters for Small Spacing Tunnels
TAN Guangzong, LI Zhijia & QIN Huihui(2217)
- Application of Integrated Geology Prediction Technologies for Preventing Geo-Hazards in Tunnel Construction in Karst District
CHEN Jianping & LÜ Qiaosen (2223)
- Study on Risk Assessment of Major Hazard Installations for Highway Tunnel Construction
LIU Hui, ZHANG Zhichao & LIU Qiang (2229)
- Predicting Method of Surrounding Rock Deformation of Tunnel and Study on Safety
XIAO Linping & LI Yongshu(2236)
- Analysis and Three-Dimensional Simulation on Stability of the Rock Surrounding in Mined-out Area Based on Block Theory
YANG Zhijun, REN Fenhua & LUO Jianlin (2241)

- Assessment on Rock Failure in Underground Caverns Based on Unified Strength Theory
LI Yuan, ZHAO Xingguang, QIAO Lan & SUI Zhili(2247)
- Study on Grouting and Bolting Reinforcement Method and Its Application to Collapse Area in Transport Roadways
SUI Zhili, QIAO Lan, LI Yuan & YANG Zhijun (2254)
- Boundary Selection in Numerical Simulation of Deformation Stability of Soft Argillaceous Shale Tunnel
HUANG Linchong, ZHOU Cuiying, ZENG Jian & CHENG Ye (2260)
- Research on Safety Practice of Blasting and Excavation Method Support Structure in Wushaoling Mountain Tunnel Line1
LI Xu (2266)

SECTION THIRTY **SAFETY MANAGEMENT**

- Effect of Individual Differences on Perceptions of Safety Culture Factors among Flight Attendants in a Taiwanese Airline of China
LEE KaiHui, STEWART Margaret & KAO LiHua(2275)
- Human Factors Analysis and Safety Management Systems: a Case Study from a Refinery
BEVILACQUA M, CIARAPICA FE & GIACCHETTA G (2280)
- Analysis of Occupational Accidents in Taiwan's Public Construction Projects
Ching-Wu CHENG, Sou-Sen LEU, Chen-Chung LIN, Chihhao FAN & Ying-Mei CHENG (2287)
- Good Business with Good Humanity, Lesson in Japan
NISHIKAWA Koji (2299)
- Effective Technical Check and Advise System for a Small Construction Site
Ki Sang SON & Il Seop PARK (2302)
- Improving Safety for the Elderly at Home
WU Shu-Wen, WU Su-Fang, LIN Chao-Yin, WU I-Chen, WU Yu-Ling,
HUNG Hsiu-Wen & Yi-Chun KUO (2308)
- Based on Effective Cycle Model to Improve Safety Culture
ZHI Xueyi, XIE Liang & TANG Minkang(2312)
- Accident Causation and Countermeasures in Highway Construction of China
TIAN Jian & CHEN Jiding (2315)
- The Analysis of Fire Causes of 21 cases of High-rise Building and Safety Countermeasures
WANG Xianyun & LIU Min (2320)
- Study of the Evaluation Method on Safety Training Quality
WANG Zhiliang (2326)
- Research on Validity of Experts Safety Check in Chemical Enterprises
GE Xiukun, SHAO Hui, ZHAO Qingxian, PAN Fangfang & HAO Yongmei (2331)
- Application of Factor Analysis in Coal Safety Management
LIU Gang (2337)
- The Quantitative Study on the Characteristic of Safety Management about the Mining with Filling Method
KE Lihua , YE Yicheng , JI Ao & HUANG Yong (2341)
- Study on WEB-Based Contingency Plan Management Information System For Mines
WU Bing, GUO Hai, ZHANG Bo, FENG Wei & YUAN Longyou (2345)
- Research on Airport Safety Management System Framework Model and Function
CHENG Ming & LIANG Wenjuan (2350)
- Empirical Study on Relationship Between HR Practice and Safety Outcomes
SONG Li, YAO Deli & WANG Jianguo (2356)

- Analysis and Prevention of Mobile Phone Accidents
WANG Xianyun & HU Ting (2359)
- Investigation on Safety Use of Cell Phone while Driving
WANG Xianyun & SHI Pengcheng (2365)
- Application of Regression Analysis on Fatal Accidents in Coal Enterprises
HUIAI Xia (2367)
- Dynamic and Closed-Loop Process Control Mode of Safety Management in Bridge Construction
WU Lirong, CHENG Weimin, DONG Shuxi, JIANG Yanquan, ZHAI Wenqi & LI Feng (2375)
- Analysis in Law Factor on China Coal Mine Safety Production Based on Dummy Variable Model
TAN Haixia, WANG Hongtu, REN Huanlin, CHEN Lin, FAN Xiaogang & YUAN Zhigang (2379)
- The Correlation of Scaffolding Accident and the Owners Safety Management
ZHAO Tingsheng, WANG Xin, TANG Jingjing & LIU Xianzhi (2385)
- Study on Safety Investment and Employee Loyalty in High-risk Enterprises Based on the Game Theory
YAN Huifang, TIAN Shuicheng & LI Hongxia (2391)
- Modeling and Application of Leader-Member Exchange on Safety Culture
MA Shuming & LUO Chuanlong (2396)
- Strengthen Safety Culture in Construction Firms by Establishing Civilized Construction Sites
LU Mei, ZHANG Wenqi & SHI Wei(2403)
- Structural Equation Modeling in Psychological Factors Affecting Unsafe behavior
WU Caihong, Liu Jie, ZHOU Xinquan & DUAN Yulong (2407)
- Study of City Environment Safety Management Model—with a Particular Reference to Jiangbei District in
Chongqing City
LI Chen, ZHOU Aihua & DUAN Chenggang (2411)

SECTION THIRTY-ONE **MISCELLANEOUS**

- NanoSost: Looking after a Responsible and Sustainable Nanotechnology
Rosa NOMEN & Julià SEMPERE (2419)
- In-situ Synthesis of Ammonia by Hydrolysis of Urea for Safe Feedstock in Power Plants in Use of Flue Gas
Conditioning and NO_x Reduction
J. N. SAHU, N. S. JAYAKUMAR & B. C. MEIKAP (2426)
- Comparative Analyses on Three Injury Surveillance Systems in Japan, the U.S. and EU
Kun ZHANG, Jinxing WANG, Katsuko T. NAKAHIRA & Yoshiki MIKAMI (2438)
- On the Theory and Practice of Dealing with Gradually Slanting Forsaken Stope
Li Junping, Zhou Chuangbing & Feng Changgen (2450)
- Research on Safety Management in the Water Conservancy and Hydropower Engineering Construction Process
ZHENG Xiazhong, XIAO Ling, ZHENG Genbao & ZHANG Guangfei (2461)
- Applied Detection Research of Mined-Out Areas in Underground Mine Based on Time Domain Electromagnetic
Method
JIA Sanshi, WANG Ende, NIU Yongxiao, YANG Yibiao, FU Jianfei & MEN Yekai (2467)
- Mechanism Research of Toxic and Harmful Environmental Factors on Renal Damage in Children
XU Zhiquan, YANG Fengxia & YI Zhuwen (2472)
- Study on Safe Distance Between Pithead Power Plant and Open Pit Slope
SUN Qifa & ZHANG Huaxing (2482)
- Study on Brisance Test for Civilian Pyrotechnics
ZHAO Baoguo, DU Zhiming, HAN Junqi, YU Yanwu, LI Zengyi, CONG Xiaomin & ZHAO Linshuang (2486)

- Application of Tris (2, 2, 2-Trifluoroethy) Phosphates as Flame-retardant Additives for Lithium-ion Rechargeable Batteries
GUO Hong, YANG Xiangjun & SUN Chengke (2493)
- Effects of Steel Fiber on the Propagation of Concrete Crack
LI Wenli, YI Cheng & CHAI Wenge (2497)
- A New Methodology of Safety Management System Expressed by Graph Theory (SMSGTE) and Its Application
WU Chao, LIAO Huimin & DONG Yuanyuan(2502)
- Safety of Microwave Irradiation on TATB Explosive and its mixture
YU Weifei, ZHANG Tonglai, YANG Li, LI Gang, ZUO Jun, LI Jinshan & HUANG Yigang (2510)
- Analysis of Material Failure of Rock in Compression
CHAI Wenge & LI Wenli (2514)
- Study on Heat Protection Performance of Refuge Chamber
WANG Sheng, JIN Longzhe & LI Jing(2520)
- Simulation and Prediction of Mine Inflow—a Case Study of Shihao Coal Mine of Henan Yima Coal Group
NING Libo, BU Xinfeng & ZHAO Guohong (2526)
- Study on Safety Technology of Shutdown and Restart Process for Waxy and High Viscosity Oil Transportation Pipeline
LI Changjun, JIA Wenlong, WU Xia & YANG Yu (2530)
- Numerical Simulation for Protection Range of Steep Inclined Upper-Protective Layer of Pitching Oblique Mining
YUAN Zhigang, WANG Hongtu, FAN Xiaogang, LIU Nianping & LIU Jingcheng(2535)
- Study on Damage Model of Rock Based on Probability Method
CHAI Wenge & LI Wenli (2542)
- Fault Diagnosis Technology for Fully-Mechanized Powered Support
CAO Yaofeng, HE Fulian, YANG Hongzeng, MIAO Yanxia & XIE Shengrong (2548)
- Research on Economic Benefit Evaluation of Qiantang Dyke for Defending Storm Tide
HU Guojian, XIN Fangyong & XIAO Hongfei (2552)
- Influence of Confined Water on Water Insulating Effect of Water-Resisting Strata in Seam Flood
FENG Meimei, MAO Xianbiao & BAI Haibo (2558)
- Calculating Method for Determination of Safety Gas Output in Air Drilling
LI Jun, JIANG Weidong, LIU Gonghui & LIU Baihong (2566)
- Mechanical Mechanism and Numerical Simulation of Cable Truss on 1 000 m Deep Coal Roadway
HAN Hongqiang, HE Fulian, XIE Shengrong, ZHANG Junhui & LI Kaiqing (2570)
- Study and Application of Refuge Chamber in Coal Mine
ZHAO Li'an & MENG Qinghai (2575)
- Three-Dimensional Pushover Analysis for Asymmetric-Plan Buildings under Bi-directional Earthquake Motions
WANG Feng & LI Xinle (2580)
- Optimized Design of Muffler Based on Genetic Algorithm
CHENG Genyin, YU Shengchen, CHEN Shaojie, WEI Zhiyong & Zhang Xiaochen (2586)
- Spatial Analysis on Livable City Safety Satisfaction Degree Index in Beijing
CHEN Jing, MENG Bin, YIN Weihong & ZHANG Jingqiu (2591)
- Effect of Aluminum Powder on Properties of Emulsion Explosives in Underwater Explosion
WANG Nafeng, WANG Liqiong & ZHANG Li (2599)
